Legend responds to Ebola outbreak

On August 8, 2014, the World Health Organization (WHO) declared the current Ebola outbreak is the largest in history and the first Ebola epidemic the world has ever known. In light of the first Ebola patient in Texas, and with the growing concern and media coverage of the spread of the Ebola virus, Legend Healthcare has been proactive in taking steps to protect their patients and staff from contracting the Ebola virus disease.

Legend Healthcare will remain diligent in our prevention and detection measures as recommended by the CDC. We also are asking those who plan to enter our facilities to remain sensitive and informed on what they can do to prevent the spread of the Ebola virus. For more information about Ebola, please access the [fact sheet](#) published by the CDC, and follow the monitoring guidelines closely if you have potentially been exposed to Ebola. If you have any questions, please contact the Director of Nursing at your respective Legend facility.

Legend Healthcare takes its responsibility seriously when it comes to protecting the health of its patients and employees. Please refer to our website at www.legendhc.com for a link to the CDC Ebola monitoring site for more information.

Legend Healthcare— Legend Healthcare is an innovative provider of Home Healthcare, DME, Physical Therapy, and Skilled Nursing with 17 Long Term Care and Post-Acute Rehabilitation Facilities throughout Texas, please visit www.legendhc.com
